

Beyond: Experience a New Era of Multiomics

Discover how we're advancing a powerful sequencing tool to a next-gen multiomic platform. Join us to:

- Get a deep dive into the development and performance of our newest technologies—Trinity™, a revolutionary workflow for target capture, and AVITI24™, our first-in-class integrated multiomics platform—directly from senior scientific staff.
- See data from early access customers already using the platforms.
- Envision the future with a 2025 product roadmap reveal from our leadership.
- Participate in an exclusive Q&A with Element executives

North America / EMEA
Wednesday, October 16, 2024
9:00–11:00 AM PST
(18:00–20:00 PM CET)

Agenda Highlights

Welcome and Introduction
Molly He, PhD
CEO and Co-Founder

Sequencing Without Compromise
Matt Kellinger, PhD
VP and Co-founder
of Chemistry

Revolutionizing Target Capture Sequencing
Shawn Levy, PhD
Chief Scientific Officer
SVP of Applications

Next Generation Single-Cell Biology: Simultaneous Multiomics with Spatial Resolution
Mike Previte, PhD, CTO
SVP of R&D, and Co-Founder
