

# EUROMicroblot – efficient blot technology for high throughput

**NEW**

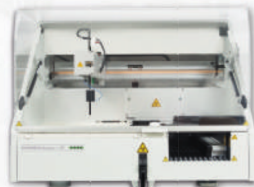

## Immunoblot in microplate format

**EUROMicroblot**

Miniaturised immunoblot test strips with pathogen-specific antigens for infection diagnostics \*

**Highly efficient and resource-saving**

## Fully automated processing for any lab size

**EUROIMMUN Analyzer I****EUROIMMUN Analyzer I-2P****EUROLabWorkstation ELISA**

## Automatic image acquisition and evaluation

**Microwell Imager****EUROLineScan**

\* Soon available: EUROMicroblot Anti-Borrelia (IgG, IgM); EUROMicroblot Anti-Treponema pallidum (IgG, IgM); EUROMicroblot Anti-EBV (IgG, IgM)
